

# THERMAPRO

## LOW-E GLASS

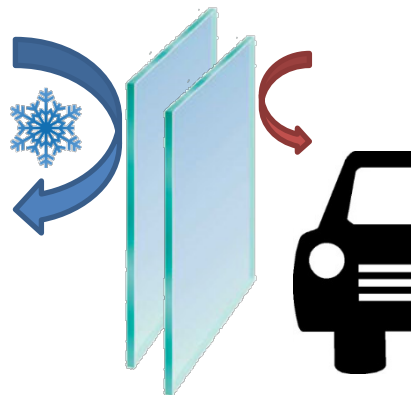

### Why Go ThermaPro?

ThermaPro Low-E glass is a smart choice. With incredible energy efficiency, you don't have to sacrifice style to conserve energy. ThermaPro Low-E glass is designed to maintain the temperature in your garage. The Low-E coating on ThermaPro **locks out the cold or the heat**. Choose the option that suits your needs and feel the difference.

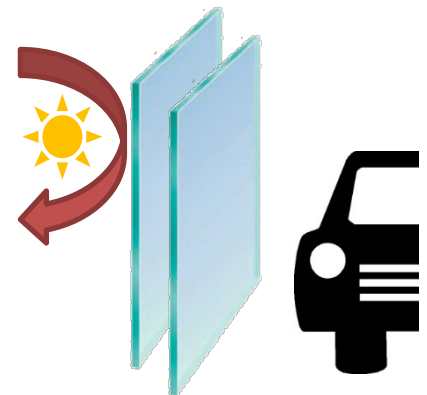

**Single Pane**  
ThermaPro Low-E

This single pane Low-E glass reflects the sun for energy efficiency. This Low-E option provides an energy efficient alternative to traditional clear insulated glass. Available in clear glass.

**CoolLock**  
ThermaPro Low-E

This insulated Low-E option is perfect if **locking out the cold** is your goal. The energy-efficient, fade-protection Low-E surface coating ensures that your garage maintains its temperature by keeping radiant heat in. Available in clear or tinted exterior glass.

**HeatLock**  
ThermaPro Low-E

This insulated Low-E glass is designed to **lock out the heat**. The fade-protection Low-E surface coating is energy-efficient and reflects solar heat to maintain your garage's temperature. Available in clear or tinted interior glass.
